Andrés Valdez Tirado

Frontend Developer | React · TypeScript · Node.js

33 14 46 87 55 andres.valdez.t@gmail.com github.com/andresvaldezt andresvt.com

PROFESSIONAL SUMMARY

Frontend Developer with 7+ years of experience building scalable, high-performance web platforms. Specialized in the React and TypeScript ecosystem, with a strong track record delivering pixel-perfect, responsive interfaces for global e-commerce platforms serving 100+ country markets. Experienced working in cross-functional agile teams, collaborating with design, backend, content, and business stakeholders. Proven ability to lead UI technical decisions, onboard junior developers, and manage release cycles with Azure DevOps.

PROFESSIONAL EXPERIENCE

UI Developer | e-Quality / TCS — Herbalife (Consultant) — Guadalajara, Mexico

April 2020 – June 2025

Core member of the Root team for myHerbalife.com, a global e-commerce platform for independent distributors across 100+ countries.

- Developed and maintained UI components and widgets consuming internal APIs across 100+ country markets, ensuring consistent cross-browser rendering and responsive behavior.
- Led pixel-perfect redesign of the Register, Login, and Profile flows to align with Herbalife's new brand platform, implementing designs from Figma with zero deviation from spec — affecting millions of active users.
- Built an internal developer tool for myHerbalife.com to register and version-control development sessions across multiple environments, reducing release conflicts.
- Collaborated weekly with content, design, backend, and business teams to deliver new web features on time, estimated effort and managed task prioritization.
- Managed frontend release versions using Microsoft Azure services in close coordination with the DevOps team.
- Provided technical onboarding and training to new team members, reducing ramp-up time.
- Supported bug resolution for a new Herbalife project built on React and microservices architecture.

Full Stack Developer | Hallmg Consulting — Guadalajara, Mexico

May 2018 – April 2020

Built and maintained HR web systems for 10+ client companies across education, real estate, pharma, and energy sectors.

- Set up full-stack web projects from scratch using Laravel, PHP, MySQL, Git, and Webpack (Laravel Mix), managing server deployment via cPanel/Plesk.
- Implemented responsive UIs with HTML5, CSS3, Bootstrap, and jQuery, ensuring cross-device compatibility for all client platforms.
- Optimized web performance by minifying CSS/JS and implementing lazy loading, improving page load times.
- Applied SEO best practices — sitemaps, keyword research, and meta optimization — for multiple client sites.
- Partnered with design and business teams to translate UX/UI requirements into functional, intuitive interfaces.

Web Developer | Tata Consultancy Services — General Electric — Guadalajara, Mexico

April 2015 – December 2017

Developed and maintained internal web communities and tools for GE business units using Support Central CMS and custom development.

- Developed and maintained multiple web communities, forms, and data-reporting tools for internal GE business teams.

- Held tri-weekly meetings with client stakeholders to gather requirements, assess risks, and report on development progress.
- Wrote technical documentation and user guides for data report control tools, supported help desk teams.
- Trained new team members on internal tools and development standards.

EDUCATION

B.S. Computer Science Engineering

Universidad Politécnica de Sinaloa • 2010 – 2014

Cloud / CI-CD	Microsoft Azure (DevOps & Releases), Vercel, Netlify
Databases	MySQL
OS	Windows, Linux (CLI)

LANGUAGES

Spanish — Native English — Advanced (B2/C1)

PROJECTS & PORTFOLIO

Personal Portfolio Website — React, Tailwind CSS, Vite

andresvt.com | github.com/andresvaldezt

Responsive personal portfolio built with React and Tailwind CSS, deployed on Netlify with a custom domain. Showcases professional experience, technical skills, and projects.

Bootcamp & Practice Projects — React, TypeScript, Node.js, APIs

github.com/andresvaldezt

Collection of hands-on projects built during active self-study and a structured bootcamp program, covering component design, API integration, state management, and TypeScript fundamentals.

DevJobs — ***React, Zustand, Tailwind CSS*** *SPA built during a bootcamp simulating a developer job board, featuring state management with Zustand.*

TodoApp — ***React, TypeScript*** *Todo application built to practice TypeScript integration in React, focusing on typed component props and state management patterns.*

dyvix-ui — ***React*** *Open-source config-driven animated React component library. Active contributor focused on component behavior.*
